

This listing of claims will replace all prior versions and listing of claims in the application:

Listing of Claims

1. (Canceled) Luggage comprising, in combination:
a bag having an ingress opening, said bag including an interior said bag having a side panel comprising, at least in part, a transparent material, said bag further including a flexible flap to cover the transparent material and a fastener mechanism for attaching the flap to the bag over the transparent material whereby to inspect content in the interior of the bag, the flexible flap is at least partially detached from the bag by release of the fastener mechanism.
2. (Canceled) The luggage of Claim 1 wherein the transparent material comprises a transparent plastic material.
3. (Canceled) The luggage of Claim 1 wherein the interior pocket is formed on its inside panel by an opaque fabric.
4. (Canceled) The luggage of Claim 1 wherein the transparent material comprises polyvinyl chloride.
5. (Canceled) The luggage of Claim 1 wherein the bag includes at least one internal pocket within the bag accessible by having an opaque interior panel and a transparent outside panel covered by a flap that is at least partially removable.
6. (Canceled) The luggage of Claim 1 including interior pockets having a transparent panel at least in part.

7. (New) Luggage comprising, in combination:

an enclosed bag, said bag including an interior enclosure and a side wall, said side wall including a transparent panel with an inside and outside;

said bag further including an opaque panel within the interior enclosure of the bag fastened to the side wall and covering the inside of the transparent panel, said opaque panel providing an interior pocket within the bag interior enclosure for retention of items therein, an ingress opening in the opaque pocket panel for access to the interior of the pocket, a fastener for closure of the ingress opening of the pocket;

a foldable opaque cover flap affixed to the side wall for covering the outside of the transparent panel, said cover flap including a peripheral edge section detachable from the side wall, a flap fastener on the peripheral edge section for attachment of the flap to the side wall and for detachment of said flap from said side wall to expose the transparent panel to thereby permit visual observation of contents of the interior pocket through the transparent panel;

a bag opening for access to the interior enclosure of the bag and access to the fastener for the interior pocket; and

a bag fastener for closure of the bag opening.

8. (New) The luggage of claim 7 wherein the fasteners are zippers.

9. (New) The luggage of claim 7 wherein the bag is in the form of a backpack and includes at least one external carry strap.

10. (New) Luggage comprising, in combination:

an enclosed bag, said bag including an interior enclosure and a side wall, said side wall including a transparent panel forming a portion of the side wall, said transparent panel including an inside and an outside;

said bag further including a pocket forming panel within the interior enclosure of the bag fastened to the side wall and covering the inside of the transparent panel, said pocket forming panel providing an enclosed interior pocket within the bag interior enclosure for retention of items therein, said pocket forming panel further including an ingress opening for access to the enclosed interior pocket;

a pocket fastener for closure of the pocket forming panel ingress opening;

a foldable material, opaque cover flap affixed to the side wall for covering the outside of the transparent panel, said cover flap including a peripheral edge section detachable from and attachable to the side wall for revealing and for covering, respectively, the transparent panel to thereby permit and prevent, respectively, visual inspection of the contents of the interior pocket through the transparent panel;

a bag opening to the interior enclosure of the bag and for access to the pocket fastener from the exterior of the pocket; and

a bag fastener for closure of the bag opening.

11. (New) The luggage of claim 10 wherein the pocket forming panel is, at least in part, substantially transparent.

12. (New) The luggage item of claim 19 wherein the fasteners are zippers.
